

CDC – Frequently Asked Questions

What is the CDC?

CDC is our newly formed Club Development Center. It's a development program imposed on us by the Canadian Soccer Association (CSA). It functions much like we already do in the winter, where the technical staff design/manage sessions, and where our players train in a festival format (stations). This for players from u8-u12 and is being implemented throughout the province starting this summer.

To compare last year's Player Development Program (PDP), we had a weekend session with tech staff and weekday session with the coaches. The CDC replaces the PDP format. All training is done within the CDC with tech staff running each session.

Who is it for?

The CDC is for all players interested in training in a safe and fun environment where the emphasis is player development. Too many players end up quitting sports by age 13 because of an unsuitable environment. The CDC hopes to develop its club members (12 and under) in an environment that will promote the sport of soccer. In the hopes that our youth continue playing soccer into their teenage years and into adulthood.

Is the CDC mandatory?

Depends, to partake in the regional league (Lac St Louis Youth League), you must register for the "full time" CDC. Those who chose "part time" will most likely play their game of the week with our recreational program. If you would only like to participate in the recreational program you do not have to register for the CDC.

So long story short, yes it's mandatory for those who choose to be in the competitive program, optional for those in the recreational program.

What do the options mean?

There are two options for your son/daughter:

Part time; which means they would train one time per week and play a game in our recreational league.

Or

Full time; which means they would train either 2 or 3 times per week (depending on age) and play in our competitive league.

If I choose "part time", do I select the day in which my son/daughter attends?

No, those who opt for part time will be invited to the following sessions:

U8: Tuesday

U9: Monday

U10: Tuesday

U11: Monday

U12: Tuesday

Is the CDC fee included in 390\$ IC Fees?

No, the 390\$ fee covers, amongst other fees; the league fees (games), referee fees, club fees, admin fees, etc.

The CDC cost is a separate fee, much like the tech staff fee was separate in the previous PDP set up.

CDC – Frequently Asked Questions

If I register my daughter/son for full time CDC will they play intercity?

Not necessarily, we have a finite amount of groups entered into the league (i.e. F10 has two groups paying games, 13 players per game) which means only about 26-28 players will exclusively play in the league. These numbers are based on the players we had in our winter program. In the event we are missing players we could pick another player from the CDC to participate in a given league game. But those players who weren't in our winter program will mostly participate in the recreational league with the possibility of playing some games in the competitive league.

We have 3 options to choose from?

Here's what the flyer says:

- 1) One time per week; Part time (U8-U12)
- 2) Two times per week; Full time (U8-U10)
- 3) Three times per week; Full time (U11-U12)

Take M10s for instance. They only find themselves in 2 of the 3 options. Option 1, which is part time and option 2 being full time. Same goes for the older groups, they only find themselves in two options and not all 3. So each player has two options, part time or full time.
